Iowa Solutions is looking to add a couple new clients and we'd like to ask you for a referral or some guidance on who we should talk to? Who do you know that could benefit from the services we offer at Iowa Solutions? Do you know of an organization looking for a good technology company? Send a quick email to Support@IowaSolutions.com and we'll contact them right away!

In the News

An article several months ago from PCWORLD really got us thinking around our office about mission critical PC's. Here is a quick excerpt. *"There's no way around it: Malware happens, drive failure happens, natural disaster happens. If your data isn't backed up, it's gone--or it will require an extremely expensive, not-certain-to-succeed recovery operation."* - PCWORLD 2007

Technology Spotlight

Computer Disaster Recovery

Every one of our clients backs up their servers on a regular basis. Even if you keep your important data on the server or a network drive, in many cases your workstation has software that is difficult or time consuming to reinstall and configure.

The entire Iowa Solutions group has been working for several months with a variety of products trying to find a cost-effective & reliable system to backup your mission critical computers. We are proud to report; we've found it! We can create an exact duplicate image of the live disk drives in the desktop/laptop and it can be saved to an external USB hard drive. The image can be restored in about an hour (on average). Traditionally if the computer lost a hard drive or had a severe virus/spyware issue the total project to get you back up and running was 3-6hrs (and (of course) it's not exactly the same(some settings are lost).

The entire backup solution runs around \$200 for the first computer and \$100 for additional computers. This includes hardware, software, and labor. Then quarterly an updated restore-point can be created so a recent image is available to restore from in the event of an issue listed above. Please give us a call to learn more!

Tips & Tricks

Ever wonder what the key located between Ctrl & Alt is used for? The **Windows Logo Key** is a shortcut key to some of your most common tasks.

- ✓ Windows Logo: **Start** menu
- ✓ Windows Logo+D: Minimizes all open windows and displays the desktop
- ✓ Windows Logo+E: Windows Explorer
- ✓ Windows Logo+F: Find files or folders
- ✓ Windows Logo+R: **Run** dialog box
